EDUCATION

University of California, Berkeley

Aug. 2023 – May 2027

B.A. Data Science

Domain Emphasis: Business & Industrial Analytics

Relevant Coursework: Data Structures, Principles & Techniques of Data Science, Data Mining & Analytics, Data Engineering, Probability & Statistics, Econometrics, Logistics Network Design & Supply Chain, Financial Analysis

WORK EXPERIENCE & INTERNSHIPS

AI/ML Developer Intern - Helping Hands Corporation | Supabase, APIs, Cursor AI *Mar.2025 - Aug.2025*

- Built the “Top Stocks” feature using yfinance and LLM-powered news/browser scraping to generate predictions.
- Developed full-stack project with supabase authentication, Render deployment, and surgical AI model platform UI.

Peer Leader consultant - UC Berkeley OASIS- Social & Media Outreach

June 2025 - Present

- Supported 1100+ Registered Student Organizations (RSOs) with registration, recruitment, and campus resources.
- Designed newsletters and social media campaigns to promote OASIS services through emails, graphics, and reels.

Program Ambassador - UC Berkeley Student Learning Center

Jan.2025 - Present

- Promote communication between students and tutors to sustain an inclusive, collaborative learning environment.
- Represent the SLC Economics Program and support students in navigating academic resources and SLC services.

LEADERSHIP

Open Project

UC Berkeley Student Org.

President | *Professional Communication, Problem Solving, Leadership*

Jan.2026 - Present

- Managing student organization with 270+ active members, overseeing 8 departments and 17 project teams.
- Organizing large-scale campus events, external sourcing, and securing sponsorships and client partnerships.

Vice President of Professional Development | *Teaching, HTML/CSS, DSA, Workshop*

Jan.2025 - Dec.2025

- Oversaw Instructor Project Managers, planned DeCal pathway, technical workshops, and career dev. events.
- Fostered collaborative learning and designed teaching resources and real projects to bridge gaps in experiences.

Computer Science Mentors (CSM)

UC Berkeley Student Org.

Senior Content Mentor & Student-Support Junior Mentor | *LaTeX, Teaching, Python*

Aug.2024 – Present

- Created and maintained python worksheets in LaTeX for course C88C, strengthened clarity and problem quality.
- Mentored weekly sections with mini-lectures, concept review, and communication, held academic speaker events.

Behavioral Economics Association

UC Berkeley Student Org.

Project Manager, Student Consultant | *Market Research, Pricing, Data Analytics*

Jan.2025 - Present

- Delegating behavioral and structural academic barriers researches, enhance FIRST's mentor & prof. dev. program
- Conducting case research and data analysis on augmented hospital AI technology adoption surveys data for bio tech.
- Developed pricing models for The Tech's African & U.S. market, based on local economics indicators and budget.

PROJECTS & RESEARCHES

Behn Meyer Agricare (Project Manager) | *AWS, RDS, PostgreSQL, FAST API, React.js* *Jan. 2026 - Present*

- Developing mobile & web application that tracks wholesaler to retailer sales using OCR and invoice submissions
- Data engineer AWS relational postgres database, create API endpoints for three user accesses and points redeem

LumenRoute(Project Manager) | *Expo, Gmail API, Firebase, Firecrawl API, Dijkstra* *Aug. 2025 - Dec. 2025*

- Developed a mobile map app that generates paths ranked by safety level, real-time alert, and community feedback.
- Automate real-time app updates with data extraction from inbox, news, and government database with AI agents.

CarbonGraph (Project Manager) | *Deepseek API, TensorFlow, OpenAI API*

Jan.2025 - Jun.2025

- Fine-tuning DeepSeek R1 Model to extract Bills of Materials (BOMs) of medical devices from science literature
- Validated BOM generation model, and generated Life Cycle Assessment analysis to provide optimized strategies.

LMNT (Web & Game Developer) | *Pygame, React, Panda, Git, LMNT API*

Aug.2024 - Jan.2025

- Created educational web platform (EduQuest) to enhance academic accessibility and learning for young children.
- Developed a spelling-bee game with React and pygame with LMNT text-to-audio API for auditory recognition.

Wearable Tech Performance Analysis | *Content analysis, Hypothesis T-Test*

Chiang's Research Festival

- Conducted original content-analysis research on how Catapult wearable technology affects athlete performance.

SKILLS

- **Programming:** Python, JavaScript, TypeScript, SQL, HTML/CSS, R; React, Node.js, Expo, Git, Data Structure, PostgreSQL; Pandas, NumPy, scikit-learn, Matplotlib, Seaborn, Pygame, TensorFlow, BeautifulSoup, Gensim, LLMs.
- **Tools:** GitHub, VS Code, IntelliJ, OverLeaf/LaTeX, Figma, Excel/Google Sheets, Notion, Qualtrics, Canva, Apollo
- **Skills:** Design, Economics, Teaching, Sourcing, Mandarin, Research, Project Management, Language-learning
